BIOMEDICAL RESEARCH**

**Customer ID: 1512
Certificate: 74-R-0003**

**P. O. BOX 760549
SAN ANTONIO, TX 78245 0549**

**Site: 001
MILITARY DR LOOP 410**

**Inspection
Type: ROUTINE INSPECTION
Date: JUL-13-2006**

2.31 (c)

INSTITUTIONAL ANIMAL CARE AND USE COMMITTEE (IACUC).

x) No animal will be used in more than one major operative procedure from which it is allowed to recover, unless:(C) In other special circumstances as determined by the Administrator on an individual basis. Written requests and supporting data should be sent to the Western Regional Office.

One protocol (b)(6), (b)(7)(c) on the same animal. An exemption for multiple surgeries needs to be requested from the Administrator. Correct By: 8-13-06

2.33 (a)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE.

(b) Each research facility shall establish and maintain programs of adequate veterinary care that include: (2) The use of appropriate methods to prevent, control, diagnose, and treat diseases.

There were outdated drugs present in the hospital treatment room. Outdated drugs need to be removed from current supplies. Corrected During Inspection.

3.75 (a)

3.75 (c)

3.75 (e)

HOUSING FACILITIES, GENERAL.

a) Structure: construction. Housing facilities for nonhuman primates must be designed and constructed so that they are structurally sound for the species of nonhuman primates housed in them. They must be kept in good repair, and they must protect the animals from injury, contain the animals securely, and restrict other animals from entering.

The following areas need to be repaired or replaced to prevent injury to the animals and to maintain the structural strength.

B cages: loose tin was present on the top of the enclosure and animals were observed manipulating the sharp edges of the tin. C cages: The chain link fencing is bowing and weakening on the front of the middle enclosures.

4.03: The wood is rotting on the bottom of the doors to this area. Correct By 8-13-06

Ernest A Johnson DVM-IMO

(2) Maintenance and replacement of surfaces. All surfaces must be maintained on a regular basis. Rust is developing on the steel beams in the chimp outside play area. This needs to be repaired to prevent deterioration. Correct By : 8-13-06

e) Storage. Supplies of food and bedding must be stored in a manner that protects the supplies from spoilage, contamination, and vermin infestation. A portable shelf containing food and other items for non human primates was stored in the room used for x-ray. These items need to be stored in an area which is away from animal use areas to maintain husbandry. Correct By: 7-14-06
