HOUSING FACILITIES, GENERAL.

All surfaces must be maintained on a regular basis . The housing facility shall be kept in good repair .

The following areas need repair :

Building 4 Room 1 : Paint is chipping off the air duct in the room . The doors to the animal rooms are eroding at the bottom and need repair to maintain husbandry .

(Note : Facility maintenance was notified about the doors)

Chimp Building 23 : There are many pitted areas on the concrete curb by the indoor enclosures. These areas need to be repaired to facilitate cleaning .

Correct By : 9-13-03

Food Storage : Supplies of food must be stored in a manner that protects them from contamination and vermin infestation .

There are spilled monkey biscuits on the floor of the main food storage building . This will serve as an attractant for pests.

There is an open bag of grain in the cold storage cooler for Building 23/24 . All open bags need to be placed in containers with lids and spilled feed cleaned up to prevent contamination of the feed by pests. Correct By : 8-15-03

Inspection was conducted with [redacted] and Dr. Pennill, USDA-Animal Care
